DETAILED ACTION

1. Applicant's amendment, filed 9/19/02, is acknowledged.

Claims 1-22 have been cancelled.

Claims 23-38 have been added and are pending.

2. Applicant's election of Group III (defined as a method of blocking the attraction of systemic memory T cells by administering an antagonist that is an antibody to CCR4) without traverse in Paper No. 6 is acknowledged.

Newly added claims 23-38 are acknowledged to correspond to the subject matter of Group III as drawn to a method of blocking the attraction of systemic memory T cells by administering an antagonist that is an antibody to CCR4.

Claims 23-38 are under consideration in the instant application.

3. Upon consideration of newly submitted claims 23-38, an additional election of species is required as set forth below.

Species Election

4. This application contains claims directed to the following patentably distinct species of the claimed invention: *wherein the species are the various sites of inflammation recited in claims 33-38.* Each site is associated with a different patient population; therefore the methods directed to each site are patentably distinct.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 23 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1644

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Drawings

7. The formal drawings submitted 4/17/01 have been approved by the Draftsman.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Roark whose telephone number is (703) 605-1209.
